

6516206635.txt

To limit satellite radio on its content is a direct limit to the free marketplace concept. These traffic and weather information channels are a benefit to all who listen. Offering these features through a new medium such as satellite radio should be embraced instead of being limited.

To limit satellite radio is simply a form of protectionism for the existing, more traditional radio channels. Please DO NOT SUPPORT the NAB petition 04-160.
